

Construction Technician

Lansing, IL

Job Type: Full-Time

Description:

B&K Equipment is seeking an individual to become a part of our growing team. A Construction Technician installs fuel dispensers, submersible fuel pumps, underground and above ground tanks, fuel product piping, (ATG) monitoring equipment, EV Chargers, and other types of equipment found in retail service stations, commercial fueling, and various other fueling locations. A Construction Tech will also assist in general construction tasks such as the removal and installation of concrete pads, removal, and replacement of backfill material and other projects related to fuel systems and facilities.

Key Competencies:

- Team oriented; work with others in the field, to build effective relationships in a cohesive environment completing a common objective.
- Demonstrates communication, problem-solving, and organization skills with the ability to successfully manage multiple priorities in a dynamic environment.
- Provide excellent customer service.
- Ability to make sound decisions using independent judgment to complete job tasks while relying on company policies.
- Troubleshooting skills/logical problem-solving skills

Responsibilities:

- Take daily directions from the Construction Manager or Foreman on work to be performed.
- Tank Installations: Assist in the installation of fuel storage tanks, ensuring compliance with safety regulations, manufacturer guidelines, and project specifications.
- Piping: Participate in piping installations, including the removal and replacement of piping systems for fuel storage and distribution.
- Repair and Upgrades: Support repair and upgrade projects by assisting with troubleshooting, identifying issues, and executing necessary repairs or improvements to fueling station infrastructure.
- Equipment Installation: Assist in the installation of fuel dispensers, tank monitoring components, submersible pumps, etc.
- Conduct work on construction projects, concrete removal and replacement, manhole and spill containment replacements, etc.
- Assure compliance with appropriate safety practices and procedures according to applicable federal, state, and local codes, regulations, and company guidelines.
- Contribute to maintaining a clean and organized work area.

Revised 5/30/2023

- Maintain tools and equipment to ensure all are in proper and safe working order.
- Accurately complete all related documentation before and after each job.
- Complete provided professional development training to stay updated with industry trends, regulations, best practices, and certifications.
